API feedback
via Online services for Digital Service Providers (OS4DSPs)

Access to OS4DSPs

The ATO's OS4DSPs is the primary support channel for digital service providers (DSPs) consuming ATO digital services.

Access to OS4DSPs requires users to setup authentication using their myGovID and Relationship Authorisation Manager (RAM).

API Feedback can be submitted via the OS4DSPs channel.

Existing DSPs who have previously registered do **not need to re-register**.

Registering for OS4DSPs

UNREGISTERED USERS

Step 1: Set up your myGovID if you don't have one.

Step 2: Organise authorisation in Manage authorisations | Relationship Authorisation Manager

Note: Your business's principal authority or authorisation administrator will need to provide you with access by selecting 'Online Services for Digital Partners' in the agency access field. This is a different agency permission to 'Australian Taxation Office', e.g. the user will not have access to Online services for Business with this permission.
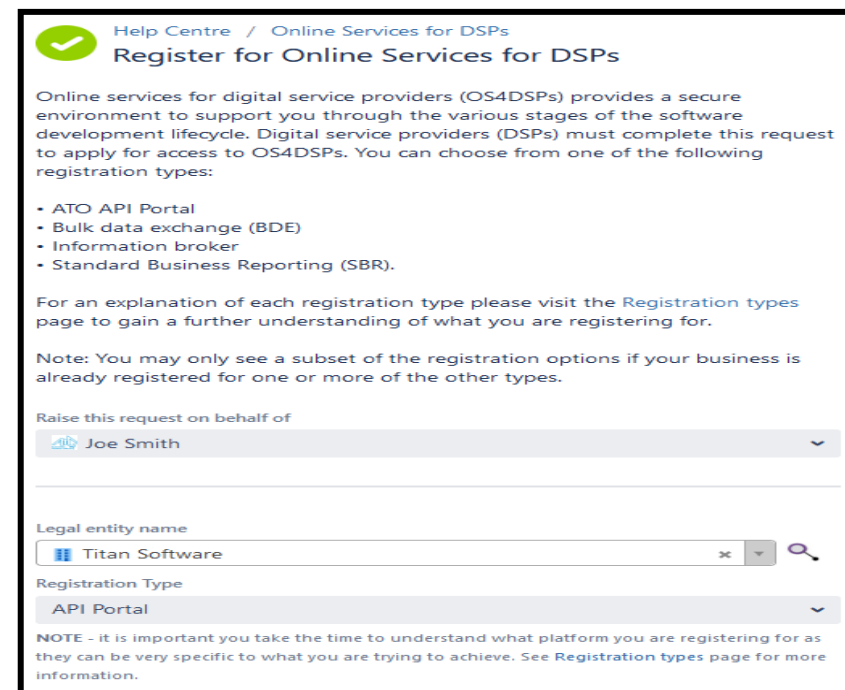

Step 3: Login to OS4DSPs using your myGovID.**Step 4:** On the service desk home page select **Registrations & profiles,** then **'Register for Online Services for DSPs'** option.

Step 5: Complete the online **'Register for Online Services for DSPs'** form.

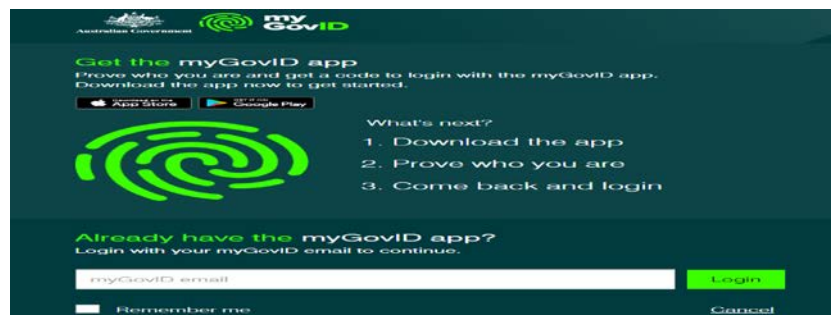

Step 6: Once the registration request has been processed, you will be able to use your myGovID to access full features of OS4DSPs including the 'Feedback' option. Please refer to the previous slide for the feedback process for registered users.
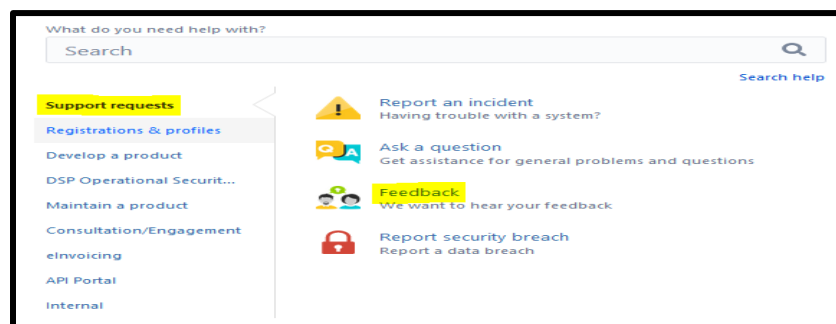

Providing Feedback on the Golden Sample

REGISTERED USERS

Step 1: Login to Online Services for DSPs using your myGovID.

Step 2: On the service desk home page select **'Support requests',** then **'Feedback'** option.

Step 3: Complete the online **'Feedback'** form.

- In **'Feedback Category'** section, select **'ATO Systems'** and then **'Modernising Business Registers'**.

- Enter your feedback in **'Provide your feedback**, field and attach files if necessary.

- Finally, submit your feedback by clicking the 'Create' option.
