# MBR Design Working Group

Wednesday 24 August 2022

Welcome and action items

Natalie Ross – Assistant Commissioner, ABRS Pipeline & Design

Mary Arrowsmith, Assistant Commissioner, ABRS Business Registry Design and Delivery

Open action items

Action Item	Status	Who	Action	Update
DWG-41	**Open**	Kylie Johnston	Demonstrate use cases with examples on uplifting certifications because of a change in API risk rating.	Item will remain on hold until additional service information is available to test the framework.

Program update

Narda Phillips – Deputy Commissioner and Senior Accountable Officer, Modernising Business Registers Program

Treasury update

Kate Penney – Director, Treasury

Golden Sample API feedback

Cedric Herbert – ABRS Delivery Integration Lead, ABRS

OFFICIAL – EXTERNAL

APIs and retail walkthrough

Cedric Herbert – ABRS Delivery Integration Lead, ABRS

Satyavrat Singh – Program Manager, ABRS Delivery and Integration

Tim Matthews – Companies Product Manager, ABRS

APIs and retail walkthrough

API0007 – Apply for Company Name Reservation
API0022 – Check Name Availability Supporting Service
API0023 – SearchNnt

API groupings

Joel Guttenberg – ABRS Architect, ABRS

What are ABRS API Products and how are they used?

- The ATO's Digital Service Gateway introduces the concept of Product Groupings.

- ABRS APIs are bundled into service offerings or Products for consumption by DSPs.

- A product is a grouping of APIs that have similar or inter-related functions.
  E.g. APIs to register different company types are grouped the Company Registration Product.

- Registering to use one or more products will grant access to all the APIs in that product.

- API Scopes, specified during registration, provide additional control over access to APIs, in combination with products.

- API risk ratings are rolled up to a Product risk which affects the onboarding requirements set by the ATO's Digital Partnership Office.

The ABRS API Product Descriptions

Following Product groupings are proposed – For Discussion.

Product Name	Summary of Product Function (Business working on formal descriptions)	API Count
Company registration and name reservation	Provides all the APIs needed to register different company types (E.g. public, proprietary) along with APIs that register Business Name and ABN. Includes the Dashboard APIs to check transaction progress.	12
Company maintenance	Includes all the APIs needed to maintain company and principal details. Includes APIs for general lodgement, CTR and dashboard functions.	19
Company entitlement maintenance	A maintenance product focused on APIs for ABN information and company entitlement management (contacts, public officers). Includes APIs for CTR and dashboard functions.	7
Agent services	Includes APIs that are used by Agents to manage obligations for companies they act on behalf of, e.g. Get Details APIs, correspondence management APIs, Transaction retrieval APIs, Annual Review Date Retrieval and dashboard APIs.	15
Entity search - Data	Includes all search APIs that provide basic company data. E.g. Search Public Entity Register and Free Current Company Extract	6
Entity Search - Extracts	Includes search APIs that return more detailed or specialised company information, E.g. Certificate of Registration of a Company, Current Company Extract and Current and Historical Company Extract APIs.	13
