

Fund USI and SPIN Lookup Table
Version 1.0 published 17 November 2014

Purpose

This table is intended to be used by employers (or their agents) to assist them in updating their payroll file with new data required to send contributions using SuperStream.

Note: The *Fund USI and SPIN Lookup Table* only contains information for APRA regulated funds excluding small APRA funds.

Version control

This table is based on version 35.0 of the fund validation service

Context

Unique Superannuation Identifiers (USI) are used in SuperStream to uniquely identify an APRA fund and/or its superannuation product which an employee (member) is contributing to. USIs replace Superannuation Product Identification Numbers which have previously been used by some (but not all) funds as a product identifier. Where an APRA fund has not previously used SPIN numbers, "No SPIN" is displayed.

How to use the *Fund USI and SPIN Lookup Table*

To use the Lookup table you will need to know either:

- Fund ABN
- Fund Name
- Superannuation Product Identification Number (SPIN)
- Unique Superannuation Identifier (USI)

Contribution Restrictions

Where a fund has a contributions restriction noted, the employer is advised to contact the fund before using this information to send contributions.

Disclaimer

The information provided in the *Fund USI and SPIN Lookup Table* is for the use of employers, super funds and their agents and **must** be used solely for the purpose of implementation of SuperStream. The *Fund USI and SPIN Lookup Table* relies on information received from third parties. The ATO cannot make any guarantees as to the accuracy of the information. If you are unsure about this information, the ATO recommends you contact the fund concerned or your service provider.
