SOFTWARE INDUSTRY WORK PROGRAM AND KEY ENGAGEMENTS

73% OF PROJECTS ON THE SOFTWARE INDUSTRY WORK PROGRAM INVOLVE **LEGISLATIVE CHANGE**

11 Legislative

4 Discretionary

NOTE: The majority of projects that have a demand on software developers are legislative. Due to this environment, non-legislative work must have a strong value proposition to even be considered by software developers, as they would always give priority to their legislative obligation.

72 ENGAGEMENTS ARE EXPECTED IN THE NEXT **SIX MONTHS**

40 IN THE **NEXT THREE MONTHS**

32 IN THE **FOLLOWING THREE MONTHS**

46% OF PROJECTS AFFECT **MULTIPLE SEGMENTS**

REINVENTION

TOP EXPERIENCE SEGMENT PRIORITIES FOR 2016-17

The following are some examples of priorities for the different segment groups the ATO deals with that have a future impact on the demand for software developer's time and resources.

PRIVATELY OWNED GROUPS

Client Profile

This service will allow for **transparent risk assessment** during lodgment. This allows the ATO to **learn more** about its client base and make **accurate** decisions.

Software developers may need to increase the data sent during lodgment.

Contemporary Digital Channel

This is a 2 way communication channel between the ATO and private groups, a dashboard for them to see information and provide feedback on it.

Software developers may need to develop a service to support the interaction.

Income Tax Assurance Notifications

Income Tax Assurance Notifications is part of a suite of **certainty initiatives** to provide **more** information to clients.

Software developers may need to incorporate these notifications in their software.

TAX AND BAS AGENTS

Increased Digital Interactions And Support

"My Practice" services for agents to interact with ATO.

Software developers may need to develop service to support the digital interaction.

SELF MANAGED SUPER FUNDS

Simplifying Rollover

Expediting and simplifying SMSF rollovers via expanding superstream to incorporate rollover of funds to SMSFs under superstream standard.

Software developers may need to support the new rollover functionality.

Improve Superannuation Data Analytics

Expanding the use of data and analytics to drive **improved correspondence** and **outbound engagement**.

Software developers may need to support the extra data in transit for super.

NOT FOR PROFITS

Deliver a **streamlined registration process** for NFP/charity.

Software developers may need to support the new registration process in their software.
